# What is Bellabeat?

A high-tech manufacturer of health-focused products for women. They want to launch a new product that will track activity, sleep, stress, and reproductive health .

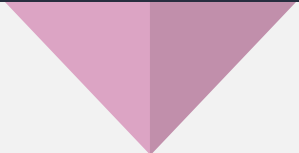

They want analyze smart device usage data in order to gain insight into how consumers use non-Bellabeat smart devices.

## Objective

Identify trends in smart device usage and find out how these trends apply to Bellabeat customers.

# Methodology

FitBit Fitness  
Tracker Data.  
Public Domain  
Made  
available  
through  
Mobius

Prepare and  
Clean Data

Create  
Visualizations  
using Python

Analyze and  
Make  
Recommendations

What were the  
findings?

No. Of Times Users Logged In App Across The Week

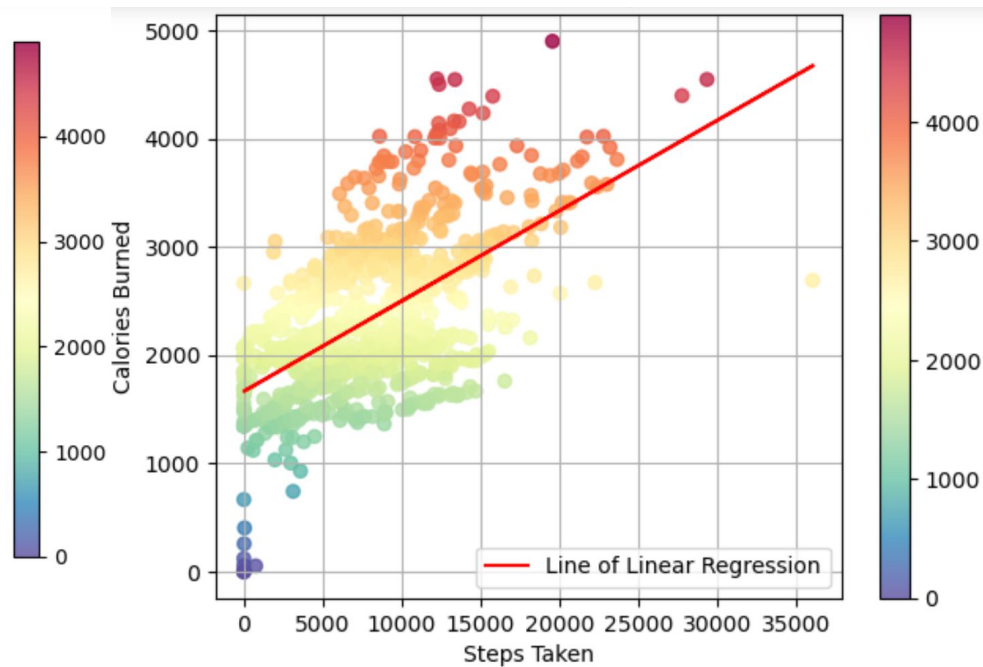

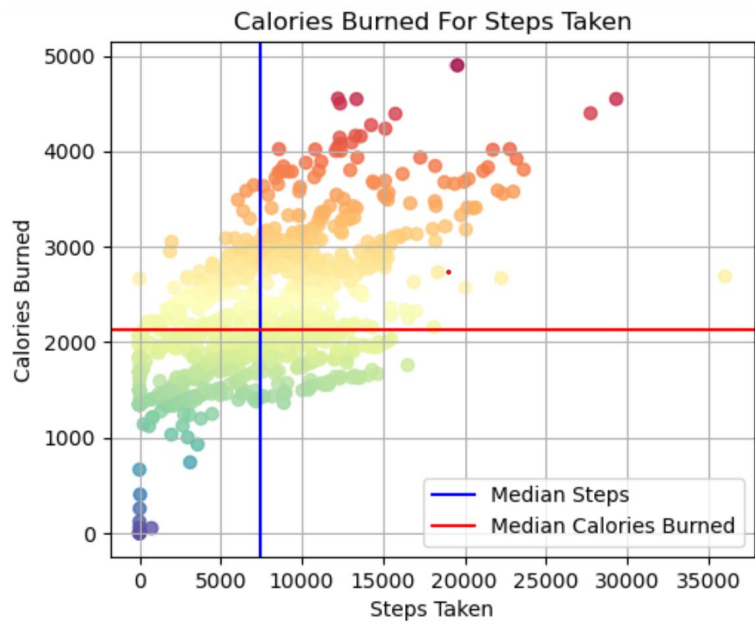

No. Of Times Users Manually Logged Their Activity

The fitbit tracker watch can automatically track activity but most users logged their activity manually.

## Total Minutes

# Recommendations

- 
- Majority of users (81.3%) are using the FitBit app to track sedentary activities.
  - Users prefer to track their activities during weekdays as compared to weekends – perhaps because they spend more time outside on weekdays and stay in on weekends.
  - Bellabeat marketing team can encourage users by educating about fitness benefits, suggest different types of exercise.

# Future Work

Separate  
data for men  
and women

1.

Get data  
from more  
users

2

Include more  
recent data and  
include other  
factors such as  
sleeping habits  
or menstrual  
cycles

3

Thank you!
